## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-2, 4-5, 7, 9 and 11 are rejected under 35 U.S.C. 102(b) as being anticipated by Schroderus (EP 0776141).

Consider claim 1, Schroderus teaches a method for providing and for billing for functionalities of a wireless identification module WIM in electronic transactions using mobile communication terminals, in which an identification and signature of a subscriber takes place via WIM, characterized in that an internal counter is installed in the WIM, which counts each signature initiated by the subscriber, whereby the signature function at of the WIM is blocked when a predetermined number of signatures has been performed (*see col. 3 lines 20-42; the identification and signatures corresponding to PIN; It should be noted that a preamble is generally not accorded any patentable weight where it merely recites the purpose of a process or the intended use of a structure, and where the body of the claim does not depend on the preamble for completeness but, instead, the process steps or structural limitations are able to stand alone.* See *In re Hirao*, 535 F.2d 67, 190 USPQ 15 (CCPA 1976) and *Kropa v. Robie*, 187 F.2d 150, 152, 88 USPQ 478, 481 (CCPA 1951)).

Consider claim 2, Schroderus teaches the method characterized in that a release/reloading of the counter is set at a predetermined value and the signature functionality is thereby released again for a predetermined number of signatures (col. 8 lines 44-53).

Consider claims 4-5, 7, 9 and 11, Schroderus teaches the claimed features (col. 6 lines 2-15).

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 3, 6, 8 and 10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Schroderus (EP 0776141).

Consider claims 3 and 6, Schroderus did not suggest that a fee for the performed signatures is charged to the subscriber upon each release/reloading. However, the examiner takes an office notice that it is notoriously well known in the art for service providers to charge a fee to released (unblocked or re-activated) any blocked devices such as SIM cards or mobile devices. Therefore, it would have been obvious to one of the ordinary skill in the art at the time the invention was made to recognize such teaching in order to charge or bill for any services rendered.

Consider claims 8 and 10, Schroderus teaches the claimed features (col. 6 lines 2-15).

***Conclusion***

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
